

# SharePointBoost General Installation Guide for SharePoint 2007 Products

## System Requirements

Microsoft Windows SharePoint Services V3 or Microsoft Office SharePoint Server 2007.

If you have not already done so, please download the SharePointBoost License Management Center available for download on this website.

## License Management

Click the link to your product in the License Management Center to visit the license management page of your SharePointBoost product.

Team Site

Home HR Department Global Local Deutsch Site Actions

Team Site > Site Settings > SharePointBoost License Management Center

SharePointBoost License Management Center

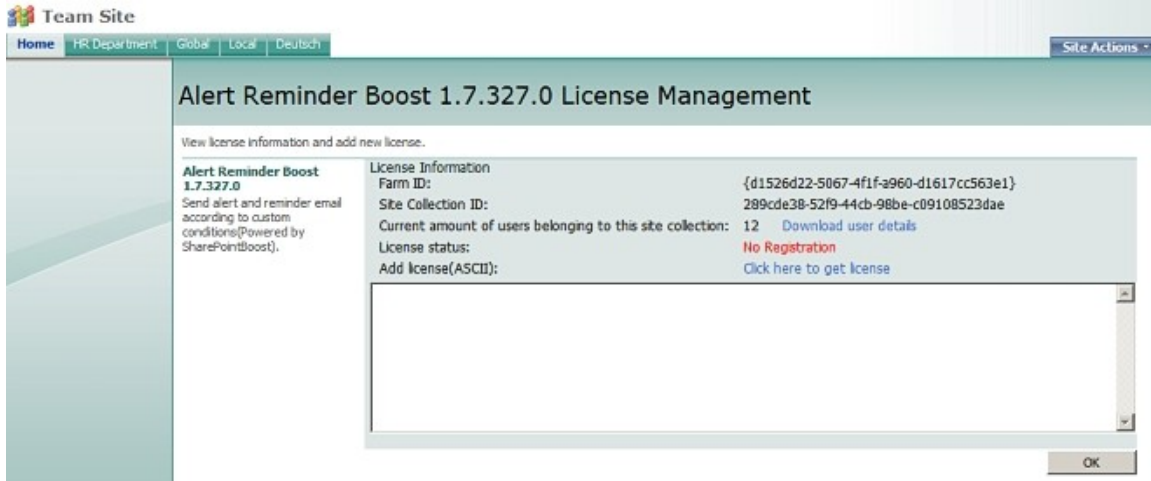

You can manage the licenses of all the SharePointBoost products activated on your site collection here.

**SharePointBoost License General Information:**

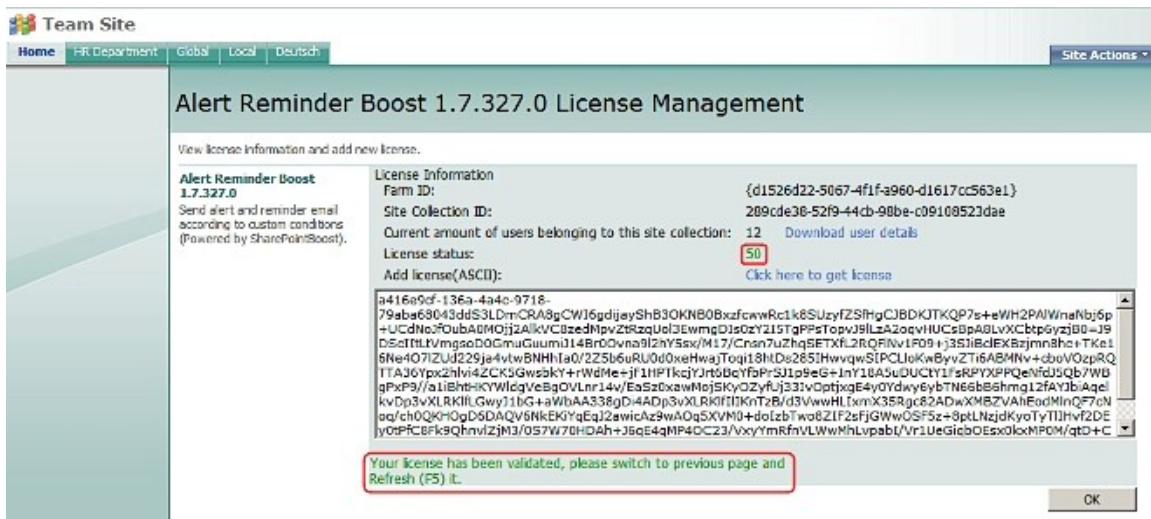

Farm ID: {d1526d22-5067-4f1f-a960-d1617cc563e1}  
Site Collection ID: 289cde38-52f9-44cb-98be-c09108523dae  
Current amount of users belonging to this site collection: 12 [Download user details](#)

Product	Description	License status	
Password Change 2.0.818.1	Allow users to change their own AD passwords and receive notifications before their passwords expire (Powered by SharePointBoost)	50	<a href="#">Click here to manage license</a>
Alert Reminder Boost 1.7.327.0	Send alert and reminder email according to custom conditions(Powered by SharePointBoost).	No Registration	<a href="#">Click here to manage license</a>

After payment is made, please send the site collection ID or Farm ID (see screenshot below) to [sales@sharepointboost.com](mailto:sales@sharepointboost.com) so that we can generate the license code for you.

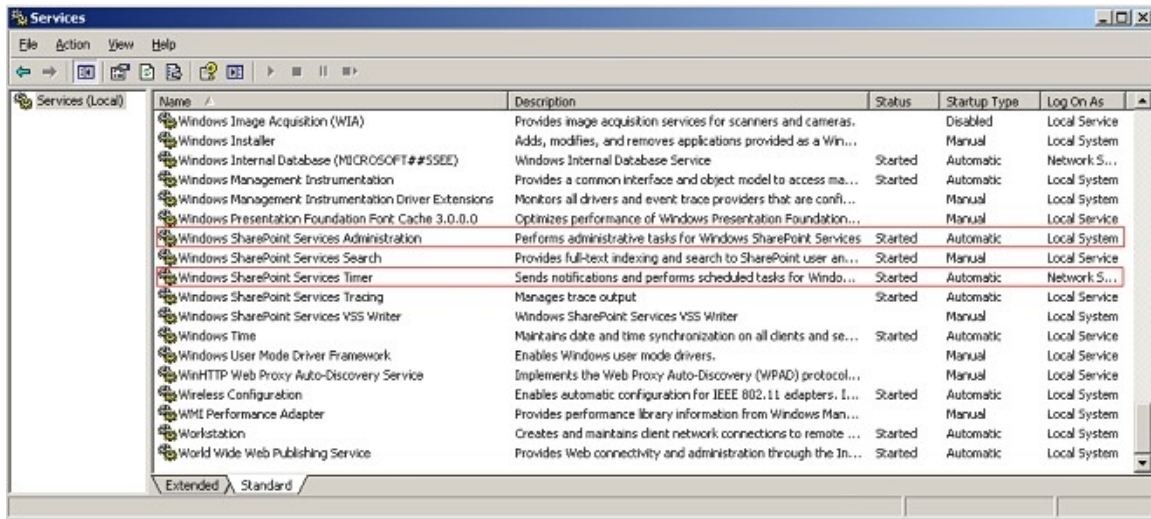

Enter into the license code and click "OK". You will get confirmation that your license has been validated (see screenshot below).

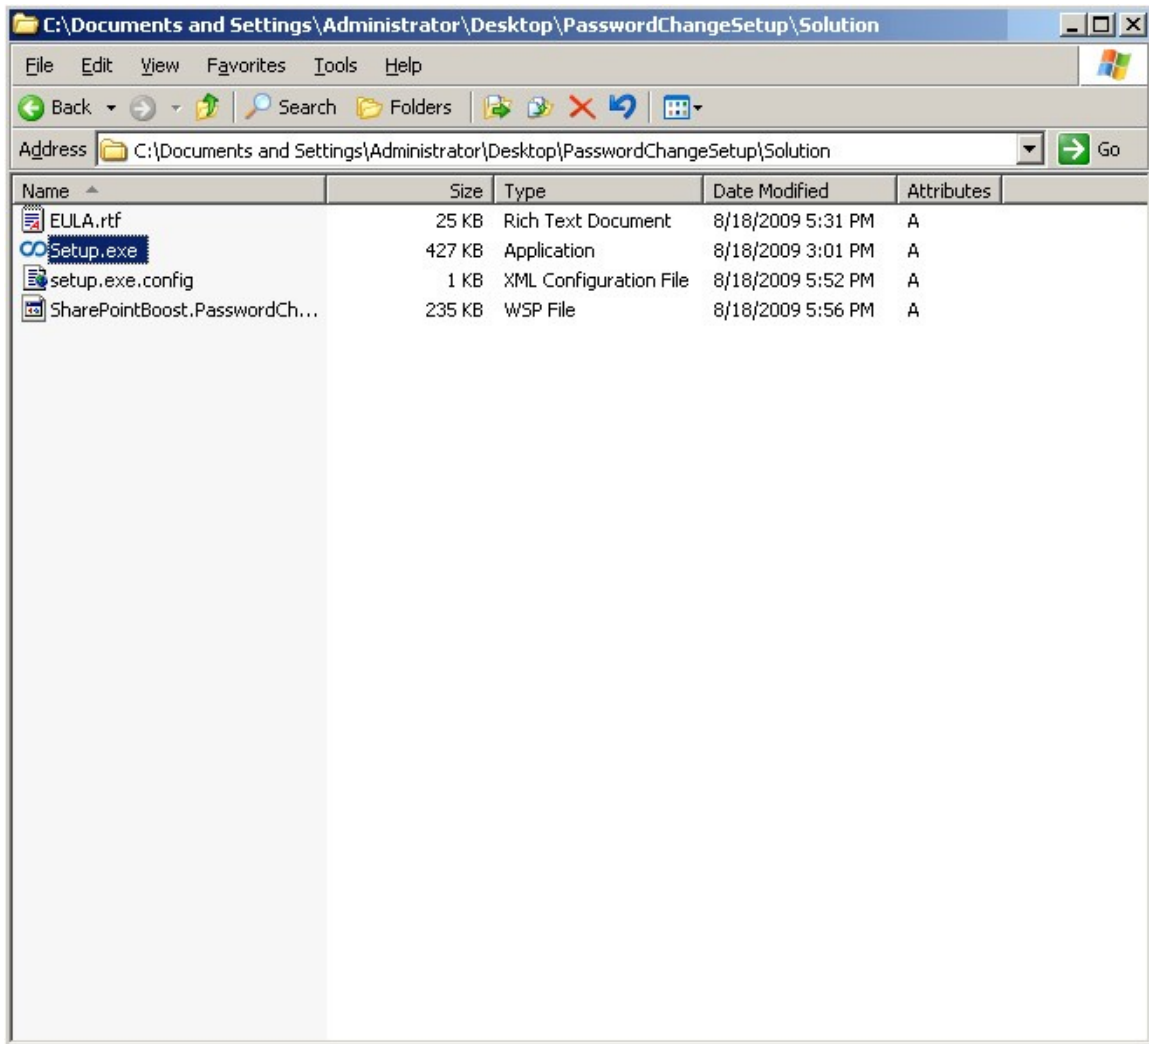

## Installation

Note:

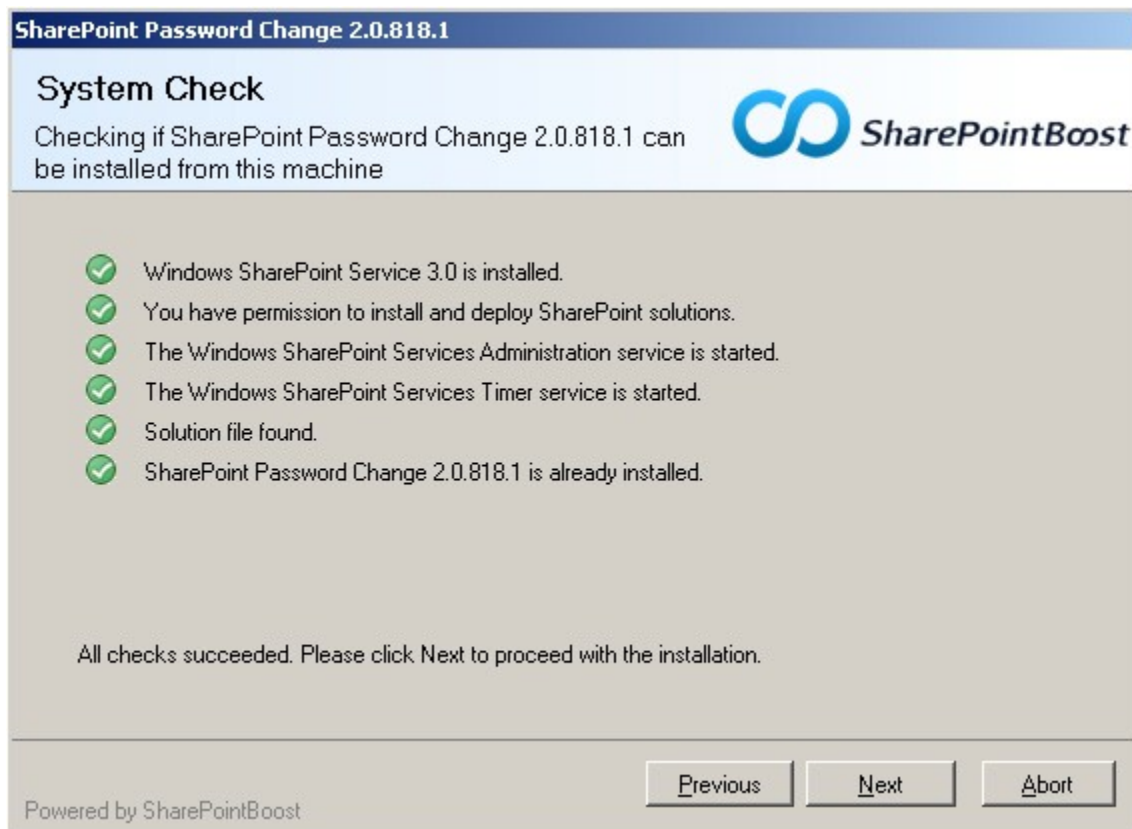

You must be the SharePoint Farm Administrator and start "Windows SharePoint Services Administration" and "Windows SharePoint Services Timer" in services management. Before you start installing the product please make sure the services are started as shown in the screenshot below.

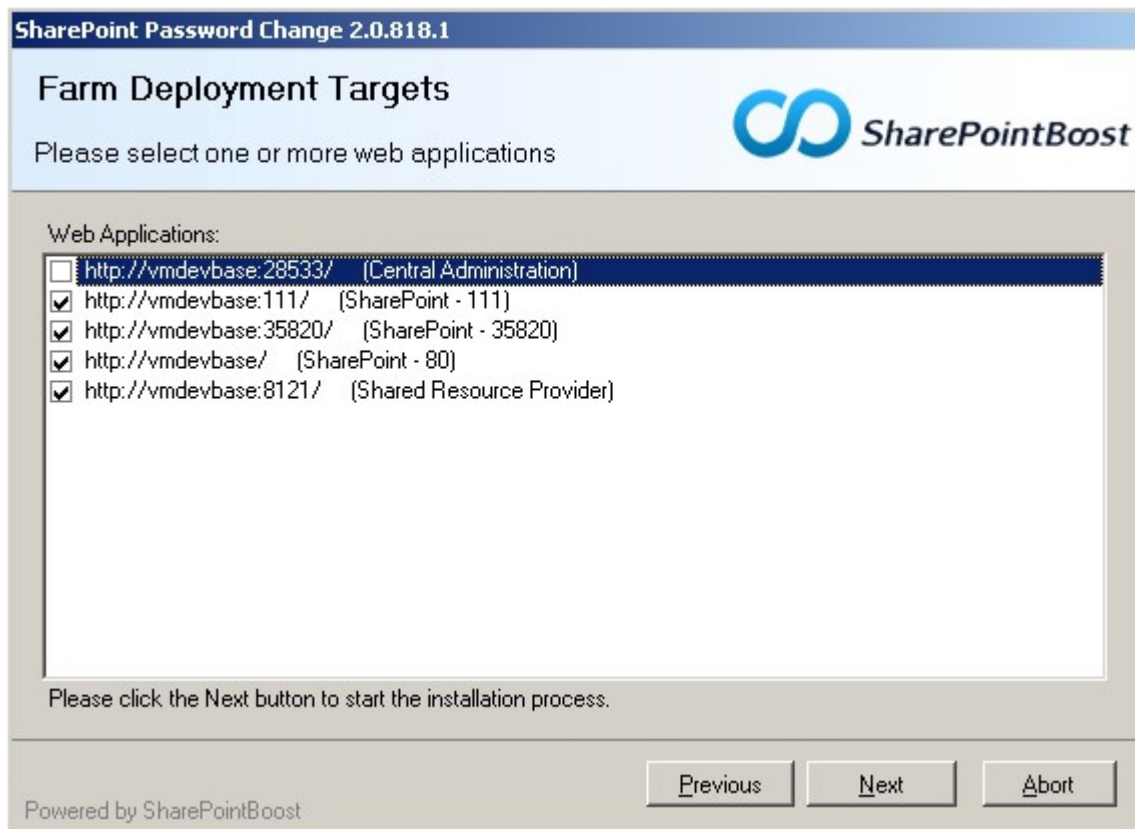

Download the archive (\*.zip) of the product of your choice from the SharePointBoost website, then extract the file. Open the created folder and run "setup.exe".

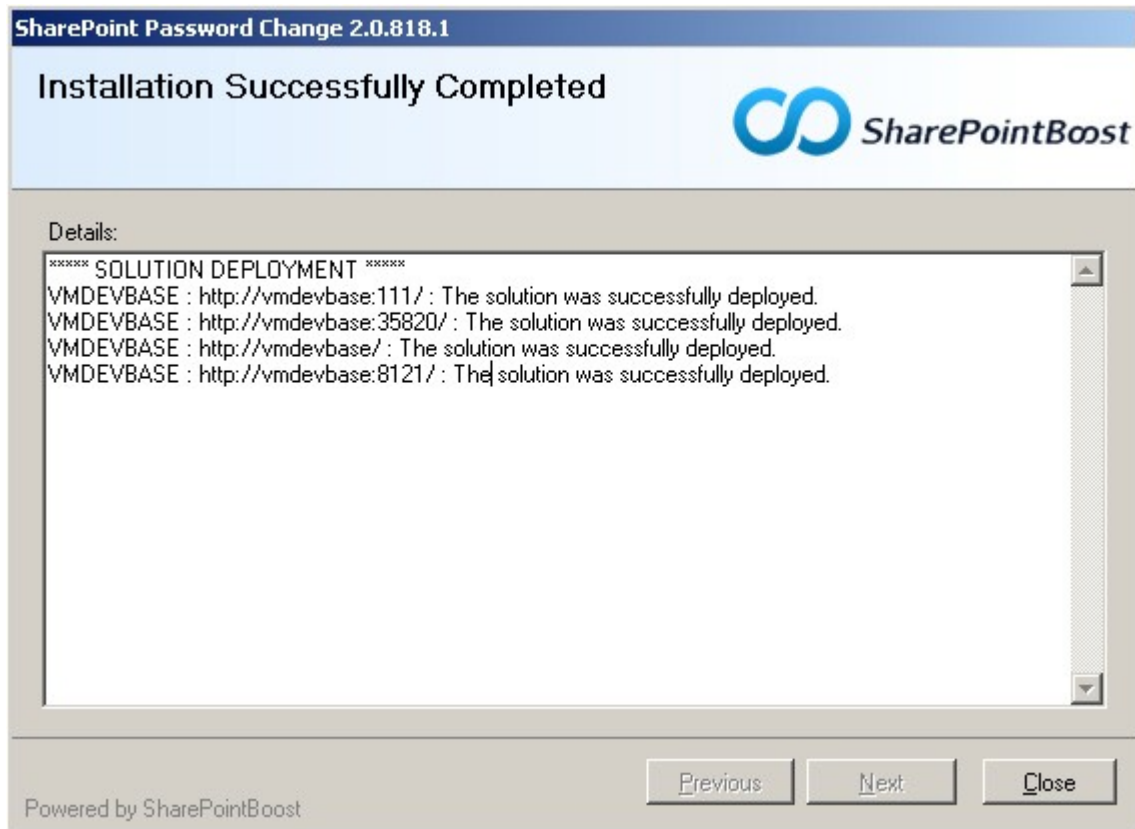

The system check is checking whether or not your machine meets all requirements for installing the SharePointBoost product. After the system check is finished, click "Next".

Please select one or more web application as deployment targets and click "Next".

Upon completion of the installation details are displayed, showing in which web applications your SharePointBoost product has been installed.

## Activation

After finishing the installation of the SharePointBoost product, the product has to be activated before it can be used. To do this, log on as the Site Collection Administrator, open the "Site Actions" Menu, then follow the "Site Settings" menu and open the "Modify All Site Settings" menu as shown in the screenshot below.

**Site Actions** ▾

In the Site collection features list, click "Activate" button of the SharePointBoost product you want to activate.

Team Site > Site Settings > Site Features

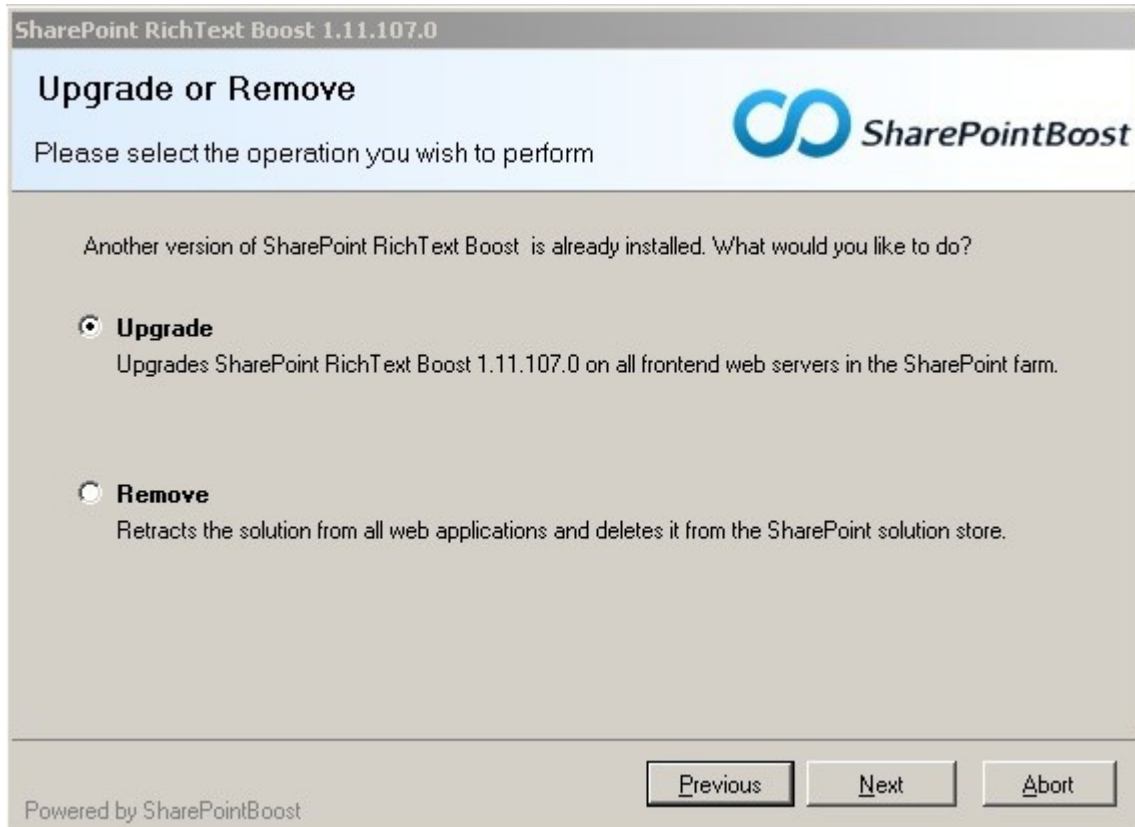

## Site Collection Features

Name	Status
 <b>Form Validation 1.4.519.0</b> Provide validation functions for list form. (Powered by SharePointBoost)	Deactivate <b>Active</b>
 <b>List Collection 2.6.730.0</b> Collect and display list items from different sites(Powered by SharePointBoost)	Deactivate <b>Active</b>
 <b>List Item Ranking 1.0.818.2</b> Allow users to manually sort and change the order of list items in SharePoint lists (Powered by SharePointBoost)	Deactivate <b>Active</b>

After activating your SharePointBoost product it is ready to use.

## Product Upgrade

Just download the latest version of our product, and run the installer. This will present you with an option to upgrade the current installation.

Please select upgrade and click the "Next" button. The currently installed version will be retracted and the new version installed automatically. There is no need to remove the installed version.

Also, all your settings will be preserved, so that the upgrade process does not affect your configuration of our products.

Note: We have recently changed our licensing system. You might be required to obtain a new license code.

We will of course provide this for free. Please contact us and provide your Farm ID or Site Collection ID, so that we can generate the new license code for you.

### **Uninstalling SharePointBoost Products**

If you want to uninstall your SharePointBoost product, please run the setup.exe file again. (If the setup file has been deleted, please download it from <http://www.sharepointboost.com>.)

In the Repair and Remove page, select the Remove radio button and click next, your SharePointBoost product will be uninstalled.

## Repair or Remove

Please select the operation you wish to perform

SharePoint Password Change 2.0.818.1 is already installed. What would you like to do?

**Repair**

Retracts the solution from all web applications and deploys it once again.

**Remove**

Retracts the solution from all web applications and deletes it from the SharePoint solution store.
